

MPO Long Range Transportation Plan (LRTP) Goals

Innovation and Economic Development

MPO	LRTP Goal
Bay County TPO	Provide a coordinated transportation system that is efficient for everyone in both time and cost.
Bay County TPO	Minimize transportation costs by coordinating land use and existing land conditions with appropriate transportation facilities .
Bay County TPO	Be consistent with sustainable community principles : (1) Economic Development, (2) Environmental Protection and (3) Social Equity.
Broward MPO	Ensure that the transportation system furtheres the economic vitality of Broward County.
Capital Region TPA	Provide residents and visitors with access to a multi-modal transportation system and to goods and services throughout the region.
Capital Region TPA	There are many forms of transportation in the region, some untapped and to be utilized in the future. The Regional Mobility Plan must create and maintain opportunities to facilitate the movement of and connections among people, jobs, goods and services.
Charlotte County-Punta Gorda MPO	Provide highway corridor capacity for the safe, secure, effective and efficient movement of people and goods.
Charlotte County-Punta Gorda MPO	Develop a financially feasible plan with multimodal facilities and services that support economic development .
Collier County MPO	A multi-modal transportation system that is balanced and integrated with all transportation modes to ensure safe and efficient movement of people and goods.
Collier County MPO	A sustainable transportation system that enhances economic growth and anticipates development demands .
Florida-Alabama TPO	Support the economic vitality of the TPO region & efficiency of the transportation system.
Florida-Alabama TPO	Encourage a multi-modal network of user-friendly transportation systems for the movement of goods and people.
Gainesville MTPO	Plan and invest to develop and maintain a comprehensive, multimodal transportation network for the Gainesville Urbanized Area that promotes economic vitality, community livability, and increased housing-employment proximity .
Hernando-Citrus MPO	The Plan will provide highway corridor capacity for the safe, secure, effective, and efficient movement of people and goods .
Hernando-Citrus MPO	The Plan will support the development of all sectors of the county's economy through the development of financially feasible multimodal facilities and services.
Hillsborough County MPO	Support economic vitality to foster the global competitiveness , productivity and efficiency of local and regional businesses.
Indian River County MPO	A connected, responsive, aesthetically pleasing and efficient transportation system that meets the needs of Indian River County residents, visitors, and businesses.
Lake-Sumter MPO	To provide a livable transportation system that enhances accessibility, increases transportation choices, and is equitable for all users .

Lake-Sumter MPO	To provide a multimodal transportation system that enhances regional economic development objectives , supports a competitive economy, and utilizes innovative transportation funding strategies.
Lee County MPO	A sustainable transportation system that enhances economic growth and anticipates development demands .
Martin MPO	An efficient multimodal transportation system to serve regional and local needs, foster economic prosperity , and ensure transportation choices for all citizens, visitors, and businesses of the Region.
MetroPlan Orlando	Economic Vitality
Miami-Dade MPO	Support economic vitality
North Florida TPO	To keep people and goods moving and help our region's economy grow .
Okaloosa-Walton TPO	Provide a transportation system in harmony with environmental, social, economic, and aesthetic features of the area.
Pasco County MPO	The Plan will be financially feasible and develop multimodal facilities and services that support economic development .
Pinellas County MPO	Contribute to the economic vitality of Pinellas County through the provision of a transportation system that provides for the effective movement of people and goods to and from major employment centers and intermodal facilities .
Polk TPO	The transportation system should be developed and maintained to support an efficient movement of freight and goods, while providing improved connectivity to major economic activity centers .
Polk TPO	Foster the economic vitality and global competitiveness of Polk County and Central Florida by directing resources to the development of the transportation network.
River-to-Sea TPO	Develop transportation systems that contribute to the economic vitality of the region and ensure that they are designed, located, and constructed in an environmentally sustainable manner.
Sarasota/Manatee MPO	Support economic vitality and ensure continued and enhanced participation in the global economy.
Space Coast TPO	Improve economic vitality through better access and intermodal connectivity for people and goods.
St. Lucie TPO	An efficient multimodal transportation system to serve regional and local needs, foster economic prosperity , and ensure transportation choices for all citizens, visitors, and businesses of the Region.
St. Lucie TPO	Transportation investments that discourage suburban sprawl and improve the economy and value of existing towns, cities, and other redevelopment areas .

Infrastructure and Growth Leadership

MPO	LRTP Goal
Bay County TPO	Plan and provide a multi-modal network of integrated, user-friendly transportation systems for the movement of people and goods.
Bay County TPO	Provide connections between new developments to reduce short trips on the major road network.
Bay County TPO	Provide a coordinated transportation system that is efficient for everyone in both time and cost.
Broward MPO	Provide a balanced multi-modal transportation system that serves the local and regional movement of people, freight, and services ; and that encourages travel by public transit .
Broward MPO	Preserve the existing and planned transportation system.
Capital Region TPA	Provide residents and visitors with access to a multi-modal transportation system and to goods and services throughout the region.
Capital Region TPA	Enhance local and regional connectivity to effectively and safely move people and goods using multiple modes of transportation.
Capital Region TPA	Create and maintain a transportation infrastructure that provides energy- and time-efficient intermodal movement of goods, services, and labor to and within urban areas in the region.
Capital Region TPA	To ensure that the funding for desired regional mobility projects is met and that necessary revenues are made available timely for the successful implementation of priority projects that promote sustainability, more efficient use of resources, and regional connectivity.
Capital Region TPA	There are many forms of transportation in the region, some untapped and to be utilized in the future. The Regional Mobility Plan must create and maintain opportunities to facilitate the movement of and connections among people, jobs, goods and services.
Capital Region TPA	A transportation system that provides access and mobility , supports compact growth and protects the region's natural environment.
Capital Region TPA	Improve public health by increasing choice, safety, and access of transportation facilities for all segments of the population.
Capital Region TPA	Promote and implement transportation system improvements for all modes maximizing security of the transportation system.
Charlotte County-Punta Gorda MPO	Develop a transportation system that serves the needs of all travel modes and provides intermodal/multimodal connectivity.
Charlotte County-Punta Gorda MPO	Develop a financially feasible plan with multimodal facilities and services that support economic development.
Charlotte County-Punta Gorda MPO	Follow state and federal requirements and ensure coordination among all involved governmental agencies to increase the efficiency of the system.
Collier County MPO	A multi-modal transportation system that is balanced and integrated with all transportation modes to ensure safe and efficient movement of people and goods.
Collier County MPO	A transportation system that is maintained, optimized and expanded using the best available technologies and innovations.
Collier County MPO	A transportation system that is financially feasible.

Florida-Alabama TPO	Encourage a multi-modal network of user-friendly transportation systems for the movement of goods and people.
Florida-Alabama TPO	Promote efficiency and effectiveness within the transportation system and the planning process.
Florida-Alabama TPO	Preserve the existing transportation system and highlight community focal points.
Gainesville MTPO	Plan and invest to develop and maintain a comprehensive, multimodal transportation network for the Gainesville Urbanized Area that promotes economic vitality, community livability, and increased housing-employment proximity.
Gainesville MTPO	Develop and maintain a safe transportation system that supports increased mobility and better accessibility for all users and neighbors of transportation facilities and services.
Gainesville MTPO	Develop and maintain a sustainable transportation system that supports and preserves the existing transportation network through integrated land use and transportation decision-making that results in compact development patterns, preservation of environmental, cultural and historic areas, reduced demand for oil, and lower greenhouse gas emissions.
Gainesville MTPO	Improve system management, operations, coordination and communication to make sound transportation decisions that reflect wise use of financial resources.
Hernando-Citrus MPO	The Plan will address the efficient, safe, and secure integration of port, airport, and rail modes of transportation, and associated intermodal facilities into one cohesive intermodal system.
Hernando-Citrus MPO	The Plan will provide for the mobility needs of all segments of the county's population by providing effective alternative modes of transportation to the private automobile.
Hernando-Citrus MPO	The Plan will provide highway corridor capacity for the safe, secure, effective, and efficient movement of people and goods.
Hernando-Citrus MPO	The Plan will support the development of all sectors of the county's economy through the development of financially feasible multimodal facilities and services.
Hillsborough County MPO	Promote accessibility and mobility by increasing and improving multimodal transportation choices , and the connectivity across and between modes , for people and freight.
Hillsborough County MPO	Preserve existing facilities and optimize the efficiency of Transportation System Management and operations.
Indian River County MPO	A connected, responsive, aesthetically pleasing and efficient transportation system that meets the needs of Indian River County residents, visitors, and businesses.
Indian River County MPO	A transportation system that provides travel alternatives which enhance mobility for people and freight.
Indian River County MPO	A transportation system that is preserved and maintained through adequate investment and management of the infrastructure.
Lake-Sumter MPO	To provide a multimodal transportation system that improves local and regional mobility and intermodal connectivity for our region's residents and visitors.
Lake-Sumter MPO	To preserve and enhance the mobility of and the accessibility of the existing transportation network.

Lee County MPO	A multi-modal transportation system that is balanced and integrated with all transportation modes to ensure safe and efficient movement of people and goods.
Lee County MPO	A transportation system that is maintained, optimized and expanded using the best available technologies and innovations.
Lee County MPO	A transportation system that is financially feasible.
Martin MPO	An efficient multimodal transportation system to serve regional and local needs , foster economic prosperity, and ensure transportation choices for all citizens, visitors, and businesses of the Region.
MetroPlan Orlando	Balanced Multimodal System
MetroPlan Orlando	Integrated Regional System
MetroPlan Orlando	Efficient and Cost Effective
Miami-Dade MPO	Enhance the integration and connectivity of the major transportation system, across and between modes , for people and freight
Miami-Dade MPO	Improve transportation system and travel.
Miami-Dade MPO	Optimize sound investment strategies for system improvements and management/operation.
Miami-Dade MPO	Maximize and preserve the existing transportation system.
North Florida TPO	To keep people and goods moving and help our region's economy grow.
North Florida TPO	To increase the accessibility of our transportation system.
North Florida TPO	To improve the connectivity of our transportation system by better connecting travel modes.
North Florida TPO	Maximize the existing transportation system to meet the needs of today and tomorrow.
North Florida TPO	To economically, efficiently, and equitably expand and maintain our transportation system.
Ocala/Marion County TPO	Develop and enhance a multi-modal transportation system that addresses the travel needs of users and facilitates the movement of freight and goods within the community as well as the central Florida region.
Ocala/Marion County TPO	Ensure the transportation system has sufficient capacity to serve the anticipated growth within the planning area.
Okaloosa-Walton TPO	Provide a safe, economical, and efficient transportation system that maximizes the mobility of people and goods , including bicyclists and pedestrians.
Okaloosa-Walton TPO	Provide an efficient transportation system which optimizes improvement and efficiency of existing transportation facilities.
Okaloosa-Walton TPO	Provide Measures to relieve financial constraints on improvements to the transportation system.
Palm Beach County MPO	The Plan will effectively address the integration of land, water, and air modes of transportation, and associated intermodal facilities into a cohesive intermodal system that serves people and freight.
Palm Beach County MPO	The Plan will provide highway corridor capacity for the safe, effective, and efficient movement of people and goods.
Palm Beach County MPO	The Plan will coordinate with other transportation plans in the region and the Regional LRTP to promote transportation and land use activities in support of regional travel for people and freight.

Pasco County MPO	The plan will effectively address the integration of port, airport, and rail modes of transportation, and associated intermodal facilities into a cohesive intermodal system that will enhance travel for all users of Pasco County’s transportation system.
Pinellas County MPO	Provide for a safe, secure and energy efficient “multi-modal” and “intermodal” transportation system that serves the transportation needs of Pinellas County while enhancing the quality of life for its citizens.
Pinellas County MPO	Contribute to the economic vitality of Pinellas County through the provision of a transportation system that provides for the effective movement of people and goods to and from major employment centers and intermodal facilities.
Polk TPO	Develop and maintain a balanced multimodal transportation system that reduces dependency on the automobile, provides a range of transportation choices, supports the efficient movement of people and goods, and provides a seamless network connecting Polk County.
Polk TPO	Develop a regional multi-modal transportation system that efficiently moves people and goods, provides for seamless connections, and is coordinated across jurisdictional boundaries.
Polk TPO	The transportation system should be developed and maintained to support an efficient movement of freight and goods , while providing improved connectivity to major economic activity centers.
Polk TPO	Maintain an efficient transportation system by managing congestion and improving traffic flow.
River-to-Sea TPO	Ensure that our transportation network considers the mobility needs of all user groups equally and is developed and managed in ways that foster safety and security.
River-to-Sea TPO	Consider the timing and location of transportation improvements to preserve and enhance existing urban areas and to recognize the development of our future.
River-to-Sea TPO	Develop an efficient transportation system that promotes a wide range of transportation options and integrates these options cohesively with the surrounding community.
Sarasota/Manatee MPO	Improve multimodal mobility and connectivity across the region.
Sarasota/Manatee MPO	Coordinate land use, promote multimodal site design , and minimize impacts.
Sarasota/Manatee MPO	Enhance system management and operations.
Space Coast TPO	Improve economic vitality through better access and intermodal connectivity for people and goods.
Space Coast TPO	Improve mobility through effective management and operations of the transportation system.
St. Lucie TPO	An efficient multimodal transportation system to serve regional and local needs, foster economic prosperity, and ensure transportation choices for all citizens, visitors, and businesses of the Region.

Quality of Life/Quality Places

MPO	LRTP Goal
Bay County TPO	Develop and maintain a transportation system that provides for the safety of residents, visitors and commerce.
Bay County TPO	Be consistent with sustainable community principles : (1) Economic Development, (2) Environmental Protection and (3) Social Equity.
Bay County TPO	Develop and maintain a responsible transportation system that meets or improves on the national ambient air quality standards for all citizens and visitors.
Bay County TPO	Develop and maintain a responsible transportation system that protects, preserves and enhances a high quality of life for all citizens, including but not limited to environmental, historical and recreation.
Broward MPO	Increase the safety of the transportation system for all of its users.
Broward MPO	Increase the security of the transportation system for all of its users.
Broward MPO	Promote sustainable systems and programs.
Broward MPO	Provide an aesthetically pleasing transportation system which improves the relationship between public transportation and land use development , and promotes the quality of life for the community
Capital Region TPA	Enhance local and regional connectivity to effectively and safely move people and goods using multiple modes of transportation.
Capital Region TPA	To ensure that the funding for desired regional mobility projects is met and that necessary revenues are made available timely for the successful implementation of priority projects that promote sustainability, more efficient use of resources , and regional connectivity.
Capital Region TPA	Improve public health by increasing choice, safety, and access of transportation facilities for all segments of the population.
Capital Region TPA	Promote and implement transportation system improvements for all modes maximizing security of the transportation system.
Capital Region TPA	A transportation system that provides access and mobility, supports compact growth and protects the region's natural environment.
Charlotte County-Punta Gorda MPO	Provide highway corridor capacity for the safe, secure, effective and efficient movement of people and goods.
Charlotte County-Punta Gorda MPO	Preserve, and wherever possible, enhance the community's social and environmental values.
Collier County MPO	A transportation system that is safe and secure for existing and future residents, visitors and businesses.
Collier County MPO	A transportation system that enhances emergency responsiveness and evacuation.
Collier County MPO	A transportation system that is sensitive to the effects to the socio-cultural elements of the communities, the community character and environmental resources.
Florida-Alabama TPO	Enhance the safety and security of the transportation system.
Florida-Alabama TPO	Enhance the Security of the transportation system.
Florida-Alabama TPO	Promote a sustainable, integrated transportation infrastructure system that is environmentally-friendly.

Florida-Alabama TPO	Encourage a multi-modal network of user-friendly transportation systems for the movement of goods and people.
Florida-Alabama TPO	Preserve the existing transportation system and highlight community focal points .
Florida-Alabama TPO	Enhance quality of life factors that will attract industry and skilled workers, and assist disabled and elderly populations.
Gainesville MTPO	Develop and maintain a safe transportation system that supports increased mobility and better accessibility for all users and neighbors of transportation facilities and services.
Gainesville MTPO	Develop and maintain a transportation system that secures the ability of the Gainesville Urbanized Area to prevent, respond to, and recover from crime, disaster, and other adverse conditions with resilience .
Gainesville MTPO	Plan and invest to develop and maintain a comprehensive, multimodal transportation network for the Gainesville Urbanized Area that promotes economic vitality, community livability, and increased housing-employment proximity .
Gainesville MTPO	Develop and maintain a sustainable transportation system that supports and preserves the existing transportation network through integrated land use and transportation decision-making that results in compact development patterns, preservation of environmental, cultural and historic areas , reduced demand for oil, and lower greenhouse gas emissions .
Hernando-Citrus MPO	The Plan will provide highway corridor capacity for the safe, secure, effective, and efficient movement of people and goods .
Hernando-Citrus MPO	The Plan will preserve, where possible, and enhance community social and environmental values .
Hillsborough County MPO	Enhance the safety and security of the transportation system for both motorized and nonmotorized users.
Hillsborough County MPO	Improve the quality of life, promote energy conservation and enhance the environment , while minimizing transportation related fuel consumption, air pollution and greenhouse gas emissions.
Indian River County MPO	A safe transportation system for Indian County residents, visitors, and businesses.
Indian River County MPO	A transportation system that is sensitive to the natural and social environment .
Indian River County MPO	A connected, responsive, aesthetically pleasing and efficient transportation system that meets the needs of Indian River County residents, visitors, and businesses.
Lake-Sumter MPO	To provide a multimodal transportation system that improves safety and security for all users.
Lake-Sumter MPO	To encourage new development into centers and corridors, enabling the preservation of countryside and conservation lands .
Lake-Sumter MPO	To minimize and mitigate potential adverse impacts to the environment that could result from transportation investments.
Lake-Sumter MPO	To provide a livable transportation system that enhances accessibility, increases transportation choices, and is equitable for all users.

Lake-Sumter MPO	To promote planning approaches that integrate land use, transportation, and community design decisions reflecting the concerns and issues of a broad cross-section of the public.
Lee County MPO	A transportation system that is safe and secure for existing and future residents, visitors and businesses.
Lee County MPO	A transportation system that enhances emergency responsiveness and evacuation.
Lee County MPO	A transportation system that is sensitive to the effects to the socio-cultural elements of the communities, the community character and environmental resources.
Martin MPO	An efficient multimodal transportation system to serve regional and local needs , foster economic prosperity, and ensure transportation choices for all citizens, visitors, and businesses of the Region.
MetroPlan Orlando	Safety
MetroPlan Orlando	Energy and Environmental Stewardship
MetroPlan Orlando	Quality of Life
Miami-Dade MPO	Increase the safety of the transportation system for motorized and non-motorized vehicles
Miami-Dade MPO	Increase the security of the transportation system for motorized and non-motorized users
Miami-Dade MPO	Protect and preserve the environment and quality of life and promote energy conservation
North Florida TPO	To make our transportation system safer.
North Florida TPO	To make our transportation system more secure.
North Florida TPO	To protect our environment, conserve energy and enhance our quality of life.
North Florida TPO	To integrate bicycle and pedestrian modes of travel onto the existing and future transportation system and to ensure through education, engineering and encouragement, that bicycle and pedestrian travel is a viable means of transportation and greenhouse gas emissions reduction.
Ocala/Marion County TPO	Continually improve upon the safe operation of local transportation facilities.
Ocala/Marion County TPO	Provide a transportation system in harmony with environmental, social, economic, and aesthetic features of the area.
Okaloosa-Walton TPO	Provide a safe, economical, and efficient transportation system that maximizes the mobility of people and goods, including bicyclists and pedestrians.
Okaloosa-Walton TPO	Provide a transportation system in harmony with environmental, social, economic, and aesthetic features of the area.
Palm Beach County MPO	The Plan will provide highway corridor capacity for the safe, effective, and efficient movement of people and goods.
Palm Beach County MPO	The Plan will improve the safety and security of the transportation system for people and freight traffic.
Palm Beach County MPO	The Plan will preserve, and wherever possible, enhance the communities' social and environmental resources.

Pasco County MPO	The Plan will provide highway corridor capacity for the safe, secure, effective, and efficient movement of people and goods.
Pasco County MPO	The Plan will preserve and, wherever possible, enhance the community's social and environmental values.
Pinellas County MPO	Provide for a safe, secure and energy efficient “multi-modal” and “intermodal” transportation system that serves the transportation needs of Pinellas County while enhancing the quality of life for its citizens.
Pinellas County MPO	Promote “livable community” concepts that allow for people to travel freely and safely in the urban environment through non-motorized travel modes such as walking, bicycling and skating.
Polk TPO	Develop a transportation system that provides for the safety and security of both motorized and non-motorized travel.
Polk TPO	Develop a transportation system that is consistent with Future Land Use Plans, is environmentally sustainable, and enhances the quality of life in Polk County.
River-to-Sea TPO	Ensure that our transportation network considers the mobility needs of all user groups equally and is developed and managed in ways that foster safety and security.
River-to-Sea TPO	Develop transportation systems that contribute to the economic vitality of the region and ensure that they are designed, located, and constructed in an environmentally sustainable manner.
River-to-Sea TPO	Develop an efficient transportation system that promotes a wide range of transportation options and integrates these options cohesively with the surrounding community.
River-to-Sea TPO	Develop a transportation system that most effectively utilizes the financial resources available and improves the quality of life for residents.
Sarasota/Manatee MPO	Increase safety in the transportation system
Sarasota/Manatee MPO	Increase security and resilience in the transportation system.
Sarasota/Manatee MPO	Expand sustainable transportation alternatives to protect the environment, reduce energy consumption, and improve public health.
Space Coast TPO	Improve the safety and security of the transportation system.
Space Coast TPO	Improve sustainability and livability.
St. Lucie TPO	An efficient multimodal transportation system to serve regional and local needs, foster economic prosperity, and ensure transportation choices for all citizens, visitors, and businesses of the Region.
